Colorado Green Consortium Releases Building Green in the Rockies Video Series

FORT COLLINS, Colo., January 28, 2007

Colorado Green Consortium has announced the public release of Building Green in the Rockies, a video series on DVD, explaining sustainable building practices and products. The series highlights projects along the Front Range of Colorado. Building Green in the Rockies has been used in educational seminars and conferences to help property owners, developers, designers, and governmental entities look at ways that they can apply green building strategies to their projects. It was featured at the US Green Build Conference held in November 2006 in Denver. Copies of the DVD are now available to the general public through the website www.greenconsortium.com.

Building Green in the Rockies has three major chapters: "Sustaining Our Communities" a general introduction video about green practices and projects in Colorado, "Greening New Construction", and Greening Existing Buildings; and is divided into topics such as "Health" Water Efficiency" and "Sustainable Sites".
